

LETTER OF RECOMMENDATION

FOR KYRIACOS ANTONIADES

06/06/2012

To whom it may Concern:

This letter goes to give my wholehearted recommendation for my colleague and friend Kyriaco. I have known him for the last ten years cooperating together in running Software Development labs in our IT Group. On every occasion he has helped me improve teaching methods, prepare new material and has been participating with keen interest in uploading exercises for our students. Definitely, one of my best lab associate I have had the pleasure to work with. Our students have always something positive to say about him and surely they enjoy his lectures that are perfectly in line with the lessons that I teach.

When Kyriaco decided to follow his Master's degree course at our University, I supported him fully. It was an honor when later that year, he asked me to be his supervisor, as he caught my attention particularly with his interest about Decision Support Systems which is one of my main areas of research. In is time (2003-2004) that I have been his supervisor in his thesis entitled "A Prototype Multi Criteria Group Decision Support System using the Analytic Hierarch Process" I have had the pleasure to share Kyriaco's imagination, innovation and vision around the subject and enjoyed the quality and appropriate research skills that he has showed. His final Thesis proves my point.

Now Kyriaco informs me of his interest in applying for a Doctoral in your Department at the University of Southampton. He is very much inspired and I am sure he would be an invaluable member of your faculty staff as he has been for us. Although I run the risk of losing a dear colleague I fully support his candidacy and give him my highest recommendation. For any further information about Kyriaco please do not hesitate to contact me.

Yours faithfully

Thanasis Spyridakos

Associate Professor

IT Group - General Mathematics Department
